Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-20, 40-42, 47 and 51, drawn to an inclined conveyor with wipers, classified in class 198, subclass 393.
- II. Claims 21-32, 43, 48 and 52, drawn to pattern forming, classified in class 198, subclass 429.
- III. Claim 39, drawn to a laterally movable conveyor, classified in class 198, subclass 587.
- IV. Claims 35, 46, 49 and 53, drawn to a detector and control system, classified in class 198, subclass 571.

Claims 44, 36, 45, 50 and 54 link(s) inventions I and II. The restriction requirement between the linked inventions is subject to the nonallowance of the linking claim(s), claims 44, 36, 45, 50 and 54. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no

longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

The inventions are distinct, each from the other because:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as spacing products on a single in line conveyor. Likewise groups III and IV have separate utility such as selective delivery with the laterally swingable conveyor or sorting products with the detector and controller. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
